DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed December 12, 2003 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because the Meineke article is not in English. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 ¶ C(1).

2. The information disclosure statement filed May 17, 2004 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Priority

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

4. Claims 3 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 3 and 15, there is no antecedent language in claims 1 and 13, respectively, for "the radar chirp".

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over the patent to Zachman ('413) when taken in view of Zupanick ('395) or Lion et al ('346).

Zachman discloses a traffic surveillance and control system (see Fig. 2). On col. 5, lines 20+, it is suggested that vehicle classification is determined based upon the width of a reflected radar signal.

The difference between claims 1 and 13 and Zachman is in what is determined by measuring the width of the reflected radar signal. The claim specifies that it is the vehicle length that is determined and Zachman discloses that it is the vehicle classification is so determined.

Lion et al and Zupanick each discloses a radar vehicular sensing and measuring system for application in a traffic surveillance and control system. It is noted (col. 1, lines 23-63) by Zupanick and the abstract of Lion et al (see also Fig. 1) that vehicle length falls within the category of vehicle classification or vehicle characteristic and may be measured by radar. Therefore, it would be obvious to one of ordinary skill in the art, in view of Zupanick or Lion et al, to utilize the system disclosed by Zachman for determining the vehicle length. Claims 1 and 13 are so rejected.

It is noted that the specifics of claims 2-12 and 14-23 are aspects of any radar traffic control and surveillance system and thus, obvious over the traffic control and surveillance systems disclosed by Zachman and Zupanick or Lion et al.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ian J. Lobo whose telephone number is (703) 306-4161. The examiner can normally be reached on Monday - Friday, 6:30 - 3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas H. Tarcza can be reached on (703) 306-4171. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
